

PANDORA

RING SIZE

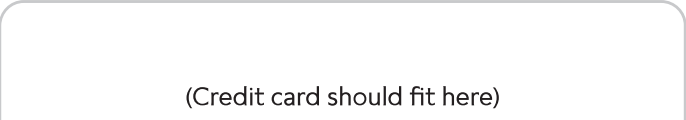

Guide

CHECK BEFORE USING:

1. Printed on Letter (8.5 x 11 inch) paper
2. Printer settings should be set to "Actual Size"

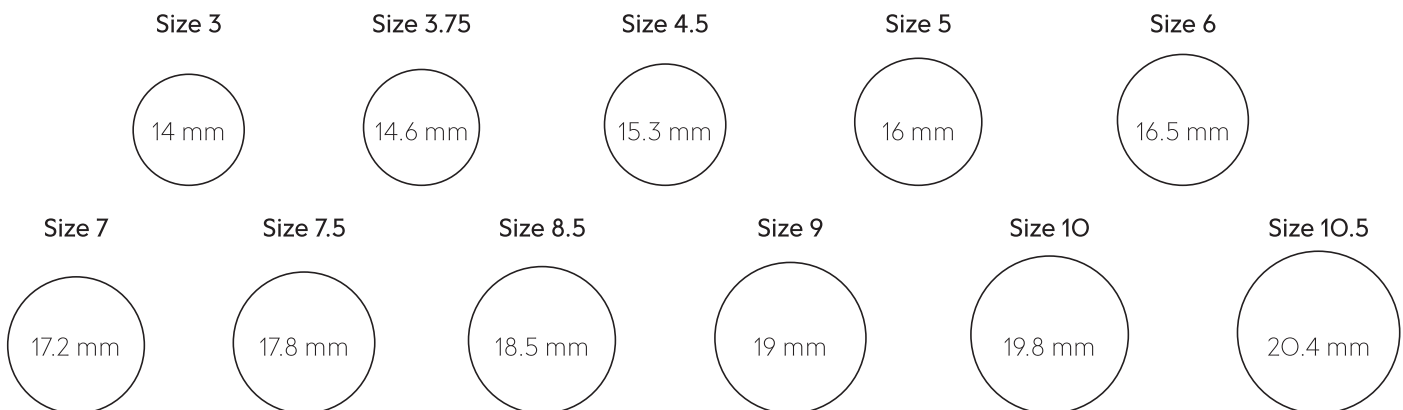

Confirm accuracy by comparing a standard credit card against the below diagram:

FIND YOUR RING SIZE

OPTION 1: Measure your existing ring

Lay a ring that fits you well on top of the closest-sized circle below. The black line should match the inside edges of your ring exactly. If you see any white space between the black line and the inside of the ring, move the ring to another size. If your ring falls between two sizes, we suggest choosing the larger size.

OPTION 2: Measure with Pandora ring sizer

Cut out ring sizer below. Create a small slit along the dotted line (don't cut to the edges). Slide the thin end through the slit with the numbers facing up, and slide onto your finger. Pull it very tightly around the base of your finger, and your ring size will be shown along the dotted line. **For the most accurate result, pull paper as tight as possible.**

**Don't worry! The correct ring size is determined based on a tight measurement, the ring itself won't fit that tight!*
