PANDORA

LAB-GROWN DIAMONDS

CONGRATULATIONS on your jewelry purchase. With proper care, your lab-grown diamond jewelry can be enjoyed for many years to come.

OUR GUARANTEE & WARRANTY

Pandora will replace or refund Pandora Lab-Grown Diamonds products based on any defects in materials or workmanship identified under ordinary consumer use for a period of two (2) years from the original date of purchase from an authorized Pandora distribution channel. CALIFORNIA ONLY: For purchases made in California that are later shipped to the consumer, the warranty period shall be TWO (2) years from the date of delivery to the consumer. Please retain your receipt or pass it on to the gift recipient, as the original proof of purchase is required to make a warranty claim. Additional terms apply. For full warranty terms and conditions, please review the Warranty page on pandora.net or call 1-855-922-2600 and ask for Consumer Affairs.

Certified by

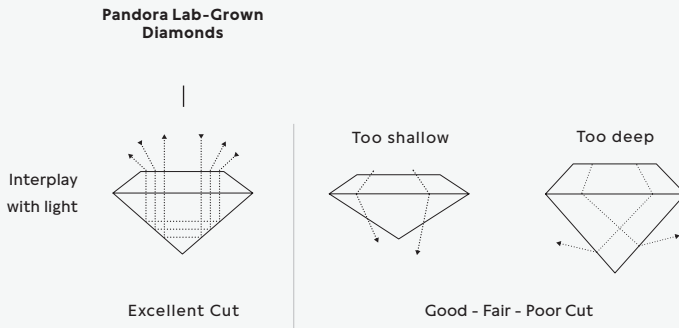

Pandora follows international diamond industry association (CIBJO) standards to ensure that the weight of every stone is always at or above the target we promise. Furthermore, all stones at 0.50 ct. and above are certified by the International Gemological Institute (IGI). IGI gives an accurate assessment of a diamond's cut, color, clarity and carat weight, according to strict international standards.

Solely in the event that the stone does not meet or exceed the advertised weight or grades, Pandora will replace any such stone with a conforming stone of Pandora's choosing. In the event that a replacement is not available, Pandora will refund the value paid for the item. For the full terms and conditions regarding this lifetime grading guarantee, please review the Warranty page of pandora.net or call 1-855-922-2600 and ask for Consumer Affairs.

CUT

Cut defines a diamond's personality and fire and is a critical determinant of its performance, or sparkle. With precise angles, proportions and symmetry, every stone we create is masterfully cut to draw maximum radiance.

All of our lab-grown diamonds are **excellent cut** – reflecting IGI standards.

COLOR

Like a report card on how white or colorless a stone is, diamonds are graded from D to Z. We accept nothing less than **near colorless stones, J quality** or better, making it nearly impossible to perceive any color at all in its iconic setting.

CLARITY

A diamond's clarity grade evaluates flawlessness or the presence of inclusions. Among the most beautiful in the industry, all of our lab-grown diamonds are **VS+** - without imperfections visible to the naked eye.

CARAT

Carat refers to the weight of a diamond, not its size. No matter which carat weight you choose, the quality of the other 3Cs remains as promised. Pandora follows international diamond industry association (CIBJO) standards to ensure that the weight is always at or above the target we promise.

All stones 0.50 ct. and above are IGI certified.

HOW TO CARE FOR YOUR LAB-GROWN DIAMONDS

Keep your new lab-grown diamonds looking their radiant best with elements from our jewelry care kit. Specifically formulated to clean and care for all types of jewelry, the kit's liquid cleaner and polishing cloth are perfect tools for the maintenance and care of lab-grown diamonds.

Step 1: Immerse jewelry in the liquid cleaner for two minutes.

Step 2: Rinse with lukewarm water and pat dry.

Step 3: Buff to a shine with the Pandora polishing cloth using the white side on gold and sterling silver and pink side on white gold.

Note:

Please do not use the Pandora cleaning brush on lab-grown jewelry.

DAILY CARE

Remove your jewelry before showering, swimming or sleeping.

To protect its rhodium coating, please keep white gold Pandora Lab-Grown Diamonds products away from hand sanitizer, perfumes and creams.

Store your jewelry in a pouch or soft cloth separate from other jewelry.
